

Landscape Designer
Job #2

Duties:

- Provide creative concept drawings for landscape and urban design projects using a combination of AutoCAD; Adobe Creative Cloud (Photoshop, Illustrator, InDesign, After Effects, Acrobat, etc.); Rhinoceros; SketchUp; Lumion; and hand graphics.
- Apply 3D modeling and rendering programs to perform digital modeling and rendering.
- Assist in presenting project to agency, governmental agencies and departments, and their representatives, consultants and general public.
- Assist in communication between client and the team.
- Develop planting ideas based on regional suitability and market of nursery stock.
- Draft landscape design development drawings.
- Assist licensed landscape architect in preparing and monitoring project schedule for in-house and consultant landscape projects.
- Assist licensed landscape architect to ensure projects are completed within budget and schedule.

Job requires Master's in Landscape Architecture plus two years' experience in the job field. Must be able to perform job tasks, including using Adobe Creative Cloud, Rhinoceros, SketchUp, Lumion and 3D modeling.
